

Swimming Pool Fence

Vinyl Coated welded wire mesh

Description -

- Galvanized After Weld core wire
- UV inhibitors in PVC retard degradation from sunlight
- Vinyl coating is flexible - will not crack when wire is bent
- Coating gives mesh double protection from rust and corrosion
- Two gauges (16 & 14) and mesh sizes (1"x1" & 1-1/2"x4") are available
- Thick layer of black or green PVC is tightly bonded to wire - will not peel

Benefits -

- Attractive
- Long lasting
- Rust resistant
- Extremely strong and durable
- Meets BOCA Code requirements for swimming pools
- Black coating is unobtrusive - blends with background
- PVC maintains its qualities in hot & cold temperature extremes

Uses -

- Swimming pool fence
- Garden perimeter fence
- Wood post and rail fence backer
