

## ~ Tortoise Exclusion Fence ~

### Welded Wire - GBW, GAW, VC

### 16 gauge - 1" x 2" mesh - 36"x100'

#### Description -

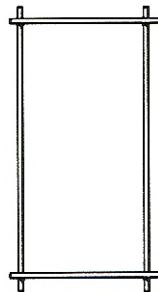

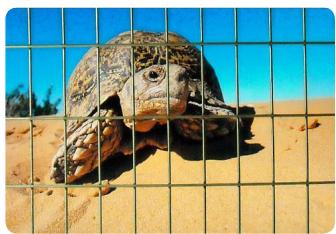

- **GBW** - Galvanized Before Weld - galvanized wire is welded into 1"x2" mesh
- **GAW** - welded mesh is drawn through bath of molten zinc after welding
- **VC** - galvanized wire mesh is completely sealed and protected in black PVC

#### Benefits -

- **GBW** - least expensive option with basic rust and corrosion protection
- **GAW** - heavy coating of zinc galvanizing guarantees superior protection and longer lifetime
  - Will last years longer than Galvanized Before products, even in harshest conditions
  - Higher initial cost is offset by lower frequency of repair and replacement
- **VC** - long lasting mesh with aesthetic appeal
  - PVC provides excellent protection from rust and corrosion
