Welded Wire - GBW, GAW, VC
16 gauge - 1" x 2" mesh - 36"x100'

Description -

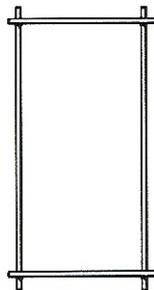

- GBW - Galvanized Before Weld - galvanized wire is welded into 1"x2" mesh
- GAW - welded mesh is drawn through bath of molten zinc after welding
- VC - galvanized wire mesh is completely sealed and protected in black PVC

Benefits -

- GBW - least expensive option with basic rust and corrosion protection
- GAW - heavy coating of zinc galvanizing guarantees superior protection and longer lifetime
 - Will last years longer than Galvanized Before products, even in harshest conditions
 - Higher initial cost is offset by lower frequency of repair and replacement
- VC - long lasting mesh with aesthetic appeal
 - PVC provides excellent protection from rust and corrosion

Product information -

<i>alloy</i>	steel
<i>finishes</i>	GBW, GAW or VC
<i>construction</i>	welded
<i>mesh opening</i>	1" x 2"
<i>wire gauge</i>	16 gauge
<i>wire diameter</i>	.063 inches/1.59 mm
<i>approximate roll weight</i>	60 pounds
<i>roll width</i>	36"
<i>roll length</i>	100'

1" horizontal
2" vertical
