

Welded Wire Mesh GAW - Galvanized After Weld

Description -

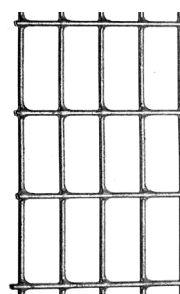

- Galvanizing covers entire mesh including welded areas
- Mesh is drawn through bath of molten zinc after welding
- GAW wire meshes are completely sealed and protected from rust and corrosion

Benefits -

- Extra long lifetime
- Strong and extremely durable
- Higher initial cost is offset by lower frequency of repair and replacement
- Will last years longer than Galvanized Before products, even in harshest conditions

Uses -

- Greenhouse benches
- Bird cages and feeders
- Industrial machine guards
- Nuisance animal exclusion
- Animal cages & enclosures
- Railing safety mesh in-fill panels
- Turtle and tortoise exclusion fence
- Long lasting home and garden fence
- Ground wire for bird and animal enclosures
- Ideal material for areas where rust and corrosion are factors
