WELDED WIRE MESH

GAW — Galvanized After Weld

The mesh is drawn through a bath of molten zinc after welding, so the wire and every welded intersection are sealed. GAW is the longer-lasting galvanized choice for wet, corrosive, or high-wear settings.

- Zinc coats the entire mesh, including weld points
- Strong and durable in harsh or wet conditions
- Common uses: cages and enclosures, greenhouse benches, railing infill, and long-lasting garden fence

WELDED WIRE MESH

GBW — Galvanized Before Weld

Made from pre-galvanized wire that is then welded. GBW is a practical, widely available welded mesh for general fencing and light-duty work.

- Economical galvanized welded wire for everyday jobs
- Broad range of gauges, mesh openings, and roll sizes
- Common uses: garden fence, temporary enclosures, light-duty cages, and general-purpose mesh

WELDED WIRE MESH

Vinyl Coated

Galvanized welded mesh with a UV-stabilized vinyl coating for extra protection and a finished look. Most items below are black; other colors are noted in the table.

- Vinyl plus galvanizing for a longer outdoor life
- Dark coating blends into landscapes
- Common uses: yard and garden fence, kennel flooring, rail infill, screens, and animal enclosures

WELDED WIRE MESH

Yard Gard

Yard Gard is a vinyl-coated welded mesh made for home and garden fence. Regular and heavy-duty styles are listed separately below.

- Finished look for yards, gardens, and kennels
- Black or green vinyl coating over galvanized welded wire
- Heavy Yard Gard uses a sturdier construction for higher traffic or larger animals

WELDED WIRE MESH

Stainless Steel Welded Wire

T-304 stainless steel welded mesh for corrosive, food, marine, or high-purity settings where galvanized or vinyl-coated wire is not the right choice.

- Welded stainless mesh in common gauges and openings
- Suited to wet, chemical, or sanitary applications

HARDWARE CLOTH

Hardware Cloth

A finer welded mesh, typically 1/4" to 1/2" openings, used for cages, screen, rodent exclusion, and workshop projects. Finishes include galvanized after weld, vinyl coated, and stainless steel.

- Smaller openings than standard welded fence mesh
- GAW, vinyl-coated, and stainless finishes
- Common uses: cages, window and vent screens, compost bins, and animal exclusion

HEXAGONAL NETTING

Hexagonal Netting

Traditional hex (chicken wire) netting in galvanized-before-weld, vinyl-coated, and stainless finishes. Used for poultry, garden protection, and light enclosures.

- Flexible hexagonal mesh that is easy to shape
- GBW, vinyl-coated, and stainless options
- Common uses: poultry runs, garden beds, tree guards, and craft projects
